

Oxalis Triangularis

Purple Shamrock (Oxalis Triangularis – Hardy to zones 6+)

Plant the bulbs sooner than later. Waiting too long can result in the bulbs getting moldy or drying out. The media inside the bag is vermiculite, you can add it to the soil when potting. Plant the bulbs in pots using a premium potting soil and use a pot that it well draining. Place the tubers 1 inch apart and plant them on their side. The sprouts emerge from one side or the other of the tuber. Do NOT break the tubers in half, this will not create more plants but will likely kill the tuber. Plant the tubers 1 ½-2 inches deep. Cover with soil. Keep the soil moist but not wet and place in a bright window, preferably one the receives morning sun. The plants will emerge in about 2 weeks. Once the plants emerge, water only when the soil has dried out almost completely. See below.

Oxalis Triangularis is hardy to zones 6/7+ so you can grow these indoors or out. If you wish to grow them outdoors in the ground, know that in their native habitat, they go dormant at the end of summer after the rain has subsided and return a few weeks to a month later. When and if they do this (depending on the rainfall in your climate,) just leave them be, they will return when conditions are right and with more bulbs. If you want to grow them in pots, indoors or out, you can more than likely avoid dormancy with consistent watering. Do NOT throw them out and assume that they are dead. They will likely return. You may not encounter this at all.

These prefer bright light to part sun. The leaves close at night by folding up. This is normal. They will re-open in the day light.

Fertilize with an all purpose or bloom boosting indoor fertilizer every few weeks. This plant is very versatile and can be kept indoors or out. If keeping outdoors in the ground, they will go dormant in winter and return in spring.

My seeds and bulbs are guaranteed to provide you with a decent yield. If you are dissatisfied with your order for any reason or the seeds don't sprout, please message me before leaving a review and I will provide advice, replace or refund. I truly care about my customers and my plants!

Please do not hesitate to contact me with any questions you may have.

Happy Planting!
Kimberly
